

Adapting and Improving an Expanded Information Sharing Environment

Posted by Kshemendra Paul, ISE Program Manager on Thursday, January 26, 2012

Today, I will be participating in the CSIS event [Information Sharing: Adapting and Improving an Expanding ISE](#) [1]. I want to give a quick overview of what I plan to discuss during the panel discussion on information sharing and the future of the ISE ? and ask you to participate. Comment below!

I plan to describe the evolution of the ISE and the progress that has been made over the course of the last year and the last decade. We will also talk about the future of the ISE, including our vision for responsible information sharing, and discuss how we are moving forward to improve information sharing and safeguarding. Mostly, I plan to actively listen.

Vision

Our shared vision for responsible information sharing includes these key ideas:

- We must ensure that any person with the appropriate mission need can discover and access actionable information at the right time to successfully prevent harm protect national security.
- Sharing must be done responsibly, seamlessly, and securely to protect the privacy, civil rights, and civil liberties of the American people while preventing unauthorized disclosure.
- And in short, the **right** data will be:
 - ready any time or place;
 - usable by any authorized consumer;
 - inaccessible only due to law or policy, not technology; and
 - protected by a comprehensive regimen of accountability.

Call to Action

I want to hear from you. Make your voice heard and help us shape the future of the ISE.

- What are the biggest challenges and opportunities facing the ISE?
- How can we improve the vision for responsible information sharing?
- Please share your ideas for accelerating the development of the ISE.

Comment below ? as yourself or anonymously. If you would prefer, feel free to send an email to outreach@ise.gov [2]. Comment on Twitter [@shareandprotect](#) [3] ? either publicly or through a direct message. I really want to hear from you and I promise to read and consider everything that you send.
